

STATEMENT OF PURPOSE

RS23069

This legislation provides more flexibility to school districts in coping with limited budgets, by providing one-third relief in FY15 from the requirement that school districts allocate a certain amount of funding for school building maintenance, under certain circumstances. This relief was provided in full for the FY10-FY13 period, and for two-thirds of these moneys in FY14, under the same circumstances. This legislation is consistent with the second year of a three-year, phased-in reinstatement of the maintenance match requirement approved in the FY15 Public Schools appropriation bill.

FISCAL NOTE

No fiscal impact to the state. School districts will be given additional tools to help in managing limited budgets.
